Washington, March 19.—Vice-President Marshall was observed in the Congressional Library this afternoon intently and somewhat excitedly reading a morocco-bound volume, which he suddenly laid down with a suppressed exclamation.

A Senator picked up the volume, which was entitled "Congressional Government," by Woodrow Wilson." This is what Mr. Marshall had been reading:

"There is very little to be said about the Vice-President of the United States. His position is one of anomalous insignificance and curious uncertainty.

"His chief dignity, next to presiding over the Senate lies in the circumstance that he is awaiting the death or disability of the President, and the chief embarrassment in discussing his office is that in explaining how little there is to be said about it, one has evidently said all there is to say."

Working in Orange, Hanover, Rockbridge, Louisa and Augusta Counties, the inspectoge met with a very cordial reception and fairly swamped the laboratory with specimens.

This campaign was undertaken for the winter months alone. When the dispensaries were classed last fall, after treating thousands of persons for the disease, the State Board of Health, working with the Rockofeller Sanitary Commission, decided to keep the inspectors busy during the winter by sending them to the schools. This work had been done in previous winters, and had been the means of procuring hundreds of specimens, but it never reached such proportions as those of last week's record.
